PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience developing enterprise banking and HRMS applications using Java, Spring Boot, Microservices, Oracle Database, PostgreSQL, REST APIs, and Docker. Experienced in developing secure backend services, implementing OAuth2 and JWT-based authentication, integrating enterprise systems, optimizing database performance, and supporting production deployments. Strong background in building scalable backend solutions for banking and HR/payroll applications in Agile environments.

TECHNICAL SKILLS

Programming Languages: Java

Frontend: Angular, TypeScript, JavaScript, HTML, CSS, Bootstrap

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate

Microservices & Integration: Microservices, REST APIs, SOAP, Eureka, API Gateway, Kafka

Databases & Search: Oracle, PostgreSQL, MySQL, Elasticsearch

Tools & Platforms: Git, Docker, Maven, Postman, IntelliJ IDEA, VS Code, Eclipse

Concepts & Practices: Microservices Architecture, API Integration, Agile Methodology, SOLID Principles

PROFESSIONAL EXPERIENCE

Interland Technology Services

Trivandrum, Kerala

Software Engineer I

July 2024 - Present

Escrow Management System (ANB, Riyad Bank & Saudi Awwal Bank)

- Developed and enhanced enterprise Escrow Management Systems for leading Saudi banks using Java, Spring Boot, Microservices, Spring Security, and OAuth2.
- Implemented business-critical modules including escrow management, customer onboarding, IPO processing, notifications, and banking integrations for enterprise banking clients.
- Integrated REST and SOAP services with internal and external banking systems while optimizing Oracle SQL queries to improve application performance and response time.
- Performed bug fixing and root-cause analysis for production issues across escrow, onboarding, and banking integration modules, while providing ongoing production support and performance tuning.

PayZo HR & Payroll Management System

<https://payzohr.com>

- Contributed to the development and enhancement of an enterprise HR and Payroll Management System using Java, Spring Boot, Angular, PostgreSQL, Microservices, and Docker.
- Developed RESTful APIs and business logic for employee management, attendance, leave, claims, and payroll processing workflows.
- Integrated Elasticsearch to enable fast full-text search and filtering across employee, attendance, and payroll records, improving lookup speed on reporting screens.
- Built and enhanced Angular-based UI modules, integrated banking and compliance-related services, and supported containerized deployments using Docker.

PROJECTS

API Monitoring Dashboard

Spring Boot, Angular, PostgreSQL, Docker, JWT

- Developed a full-stack monitoring platform that tracks API availability, response times, and uptime metrics through scheduled health checks.
- Implemented JWT-based authentication and role-based access control with separate Admin and User roles, securing dashboard access and API endpoints.
- Built RESTful APIs, interactive dashboards, and a Dockerized deployment pipeline for streamlined monitoring and reporting.

Distributed E-Commerce Microservices Platform

Spring Boot, Microservices, Eureka, API Gateway, Kafka, PostgreSQL, Docker

- Designed and implemented a scalable microservices-based e-commerce backend consisting of product, order, inventory, and notification services.
- Implemented Kafka for asynchronous, event-driven communication between order, inventory, and notification services, decoupling services and improving system resilience.
- Integrated service discovery, centralized routing, and secure API communication across services.

EDUCATION

B.Tech, Computer Science and Engineering

2020 - 2024

GITA Autonomous College, Bhubaneswar, Odisha (BPUT Affiliated)

CGPA: 9.29
